

Low Carbon Devon provides **free** support to Organisations and Enterprises who want to:

- ✓ **Reduce** their carbon emissions through energy efficiency in buildings

- ✓ **Reduce** energy bills using existing building data and improving occupants' behaviour

- ✓ **Develop** energy visualisation tools to monitor energy use

- ✓ **Improve** indoor environment quality to increase staff productivity and satisfaction

Potential **Benefits** to Enterprises/Organisations

- ❖ Reducing energy consumption and saving on energy bills
- ❖ Changing occupants' behaviour
- ❖ Improving indoor quality and increasing occupants' productivity

Contact Dr Sepideh Korsavi, Industrial Research Fellow in Energy Efficiency in Buildings to find out how Low Carbon Devon can help your business meet net zero targets.
