

Manufacturing industry outlook 2023

Join us for a look back at some of the key issues faced by UK industry in 2022 and what to expect in 2023. Together with some of the leading voices in UK manufacturing, we'll be exploring the trends, opportunities, and challenges both at home and abroad.

- **Date:** 19 January 2023
- **Time:** 09:30 to 10:30 (GMT)
- **Location:** Virtual

Manufacturing businesses have faced a number of challenges in 2022. Post-Brexit and COVID-19 global supply chain challenges, China's 'zero COVID' policy, the war in Ukraine, and other macro trends have forced companies to consider diversifying their supply chain operations, as well as look for new markets to expand their sales. Companies need support in exploring demand, navigating bureaucracy, and connecting with trusted partners when trading internationally.

To support you in this fast-moving environment, we are hosting this manufacturing 2023 event, where we will be joined by some of the leading voices in UK manufacturing and wider industry leaders, as well as Santander's own Chief Economist. As we head into 2023, we want to take a look back at some of the key issues that have impacted UK manufacturing in 2022, but more importantly look forward to what to expect to see in 2023. This includes where we see future trends and opportunities both in the UK and globally for UK manufacturers, as well as some of the potential barriers. We'll also explore the support available to companies looking to explore new markets, as well as grow in existing ones.
